Subject: Fwd: Jeff Mansfield: RE EPA Enforcement VOTCSA email..

Forwarded is an email I received. This email is totally out of place and erroneous but needs a response from the rightful authority on arsenic violations. Personally, we all have work with dedication to comply with the Federal regulations and requirements to use water with arsenic in our public water system. We have all been for years waiting on the HAMP for remedy and I have repeated that we have no authority over its management. We had planned to install filters at our two pumps and were asked by EPA and Hopi Tribe to remain with the HAMP. I have been verbally targeted for the past years by our local Community Service Offices and now am subject to this written harassment. I personally have a lot to report to the Federal Investigator and I'm sure you as water program employees do to. This accusation must be reported and investigated immediately, otherwise these individuals will not stop. I'm willing to step aside from my Administrative position until the investigation is complete. We all know we work hard to be in compliance of all EPA regulations. I have included in this email our Hopi Tribal Council Representatives, HAMP Director and EPA official. I want to know, are we in serious violations of EPA non-compliance laws. Our office have documents from EPA under certain contains to use water arsenic I will say this activity is politically motivated to destroy our Traditional Village Government and is supported by our Hopi Tribal Leaders sworn to uphold our Constitution and By-laws of the Hopi Tribe. I also now consider this as an act and violation of deformation of character. I seek your advice and comments.

Subject: Jeff Mansfield: RE EPA Enforcement VOTCSA email..

Ivan,

I think you may need my assistance once again in regards to the EPA compliance issue..I have copied the following email issued from the Village of Tewa's CSA. She is on a mission, and is targeting you. Here is the email and I hope you keep this between us. Thanks Ivan.

Hello TEAM,

I received a phone call from her this morning and asked questions as to why she was calling as the Village of Tewa does our own daily updates that are shared over the airwaves as well as other posted sites. She was very allusive after I said I smell some dirty ivan tactics. I told her Village of Tewa will not be a part of the manipulation and falsehoods regarding his role and hers. She said, "well thats too bad that Tewa does not want to be part of the "fmcv bulletin board" . I said its too bad that you do since you say you are Tewa, surely you know that he is a crook and killing your people with arsenic water. No reply and I finally said, the Village of Tewa does not wish to have our factual information corrupted by any of sidney's staff. We will post for our own community as sidney DOES NOT SPEAK FOR THE VILLAGE OF TEWA." Thank you and hung up.

Also received a very welcoming letter from the EPA at the government level regarding the arsenic

issue. He is deep in the pits of misery and we will not let this go as per EPA head. He had until March 31, 2020 to fix the water problems and to be in compliance or the Enacted Enforcement Investigation will put him at a higher tier of compliance and he was told that the "fmcv water department WILL NOT receive any more subsidiary funding until all findings have been rectified to the EPA's standards, not his".

I relayed this to my Board and also said this is why he is trying to use a non existent traditional governance to hide behind to gain access to the emergency funding intended for village emergency assistance, as a way to pay for the arsenic issue."

*5 out of the 7 recognized Clan Leaders not only NEVER met with ivan and his cronies about the emergency funding, but they also NEVER agreed to designating him in any administrator position and never will. They said "he is not to be trusted and that he holds no religious role and does not even participate in traditional obligations due to the fact that "he is nobody in our religious sects and neither are his self appointed mongwis". I know this to be true as they have all told me personally and in our clan leader meetings. They are very upset that he continues to lie while using their names on documents that they no nothing about nor would they agree to when it comes to his "greed and graft". The Clan leaders will not let this go and they have issued a statement which will be made available once it becomes a public notice.

Lilian, may you please forward this information on behalf of the Clan Leaders and the Village of Tewa, to IC Tuutsie, he needs to be made hyper aware that this is happening as a deflection to the underlying motives regarding the ivan/ fmcv's utter failure to comply with the Clean Water Act and other active enforcement investigations that he is named in. This in and of itself, should raise red flags about why he is should never have sole authority to disburse any amount of funding due to his history of failed business ventures, no transparency of expenditures, no accountability and definitely a manipulator of words that clearly have false narratives that only benefit him. This is all factual information that HERT commander must look at in order to be fairly represented in this fight against this virus issue. (Do have the meeting minutes completed by chance?)

PS: ivan knows he wont come here to Tewa as he is a coward and he knows he is not welcome, although my security cameras caught him scoping out our property after hours last week. Guess that was his tainted version he made to Sichomovi board that he "was going to Tewa after their meeting was over." Never happened and again another LIE.

Thank you Lilian for ensuring that the truth is made known

Ivan,

Email me if you have any questions, I am limited on my knowledge of this concern of VOTCSA, but I feel that they do not understand the specifics of the AOC from EPA with regards to FMCV's PWS.

Thx

Jeff
